

The London Air Quality Network

Formed in **1993** by the London Boroughs,
the NHS and the University of London

With over **100** active monitoring sites,
it's Europe's leading network
(And 11 outside London too!)

250 analysers
43 different instrument types
2 research supersites

5 sites involved in traffic accidents
1 site searched by HM customs
1 site stolen

Over **500,000,000**
measurement in the LAQN database

(With **193,000** added every day!)

We measure particles down to
0.000000003 m in diameter

And from **-58m** below
London to **+2000m** above!

Communicated to...

150,000 London & City Air app users

138,000

annual web visitors

5,500,000 pollution notifications
sent during 2015 spring smog

16,000 people see
the LondonAir
forecast every day

LAQN membership
costs reduced by
48% since 2009

£21k investment
by King's in LAQN
comms in 2015

The LAQN supports
£16,000,000 of
research funding for
London & UK Uni's

One

Unique partnership between a university,
local and central government, communities and business

A network to make London proud - thank you for your support
