

MRC-PHE Researchers' Society Christmas Gala with Prof. Nick Molden

“Why keeping diesel cars on the road could be the best solution to the air quality crisis.”

Wednesday 6th December, talk starts at 5pm

Free drinks reception to follow

G.73 FWB

**Nick Molden, Founder & CEO
EMISSIONS ANALYTICS**

Join us to hear:

- The origin of the current air quality crisis
- Failure of regulation and government policy
- How independent research was required to identify the problem
- Can diesels be clean?
- The public and private cost of solving air quality
- Pros and cons of electric vehicles
- Why technology neutrality is important
- What would an optimal outcome look like?

EVERYONE WELCOME
